To Whom It May Concern:

Please accept this letter as our formal endorsement of the "GalvaFlex" roof panel system. We only do this because "GalvaFlex" is so superior an installation & is serving the needs of Kirtland Air Force Base so well. Currently, we have it placed on three very important roofs here.

Although it has a slightly higher initial cost than some other metal roof systems, when evaluated for its 40-year estimated & warranted useful lifetime, it should be seen as being quite cost effective. We endorse it additionally for: its clean lines & profile; excellent weather-proofing capability; wind resistance; reflectivity & insulation translates into very good thermal properties.

Feel confident, as we do, that "GalvaFlex" is the best roof that your money can buy. Some buildings & tenants simply demand the best.

Timothy W. Turner, P.E.

Roof Program Manager
